

Indian Space Olympiad (ISO) 2026

SYLLABUS - JUNIOR LEVEL (CLASSES V–VI)

01. Fundamentals of Astronomy

Introduction to astronomy, the night sky, celestial objects, constellations, celestial sphere (basic), telescopes, astronomical observations, directions in the sky, astronomical events.

02. The Solar System

Formation of the Solar System (basic), the Sun, planets, dwarf planets, natural satellites, asteroids, comets, meteoroids, meteors and meteorites, planetary features.

03. Stars, Galaxies & the Universe

Stars and their properties, constellations, star clusters, nebulae (basic), galaxies, the Milky Way, the Universe (basic concepts).

04. Earth & Moon

Earth's structure, atmosphere, rotation, revolution, seasons, day and night, time zones (basic), Moon phases, eclipses, tides.

05. Satellites & Space Technology

Natural and artificial satellites, communication satellites, navigation satellites, weather satellites, remote sensing, applications of satellites.

06. Rockets & Launch Vehicles

Principles of rockets, launch vehicles, rocket stages, payloads, launch sites, reusable rockets (basic).

07. ISRO & India's Space Missions

ISRO, major space centres, PSLV, GSLV (basic), Chandrayaan missions, Mangalyaan, Aditya-L1, Gaganyaan, India's achievements in space.

08. Space Exploration

Astronauts, space stations, Moon missions, Mars missions, major international space agencies, famous space missions.

09. Basic Physics for Space Science

Force, motion, gravity, Newton's Laws (basic), work, energy, heat, light, sound, electricity and magnetism (basic concepts).

10. Scientific Reasoning & Logical Aptitude

Scientific observation, logical reasoning, pattern recognition, data interpretation, analytical thinking, numerical aptitude.

11. General Space Awareness

Current space missions, recent discoveries, famous scientists and astronauts, important space events, applications of space technology.
