Winter School of Space Science 2026

Indian Space School proudly presents the Winter School of Space Science 2026 (Group 2) — a seven-week online learning program designed to introduce school students to astronomy, the Solar System, stellar evolution, extraterrestrial life, space physics, rocket science, space exploration and modern space technology.

The program combines expert-led sessions, practical activities, assignments, and project-based learning, exploring topics from Planet 9, stars, black holes and extraterrestrial life to rocket engines, propulsion, satellites and space exploration.

The program will be conducted over 7 weeks, structured as follows:

- **Weeks 1–4**: Core Space Science Learning and Expert-Led Sessions
- **Week 5**: Guided Space Science Project Preparation
- **Weeks 6–7**: Project Development, Mentoring, Evaluation and Submission

Participants will receive guidance throughout the project phase and will have the opportunity to apply their learning by developing, completing, and presenting a Mini Space Science Research Project.

Eligibility:

- Students currently studying in **Grade 5 to Grade 10** are eligible to apply.
- Participants should have access to a mobile phone, laptop, desktop or tablet with a stable internet connection to attend online sessions and complete learning and project activities.
- Applications must be submitted through the official online registration portal.
- Admission will be conducted on a first-come, first-served basis. The registration portal may close once the available seats are filled.

Application Process:

- Last Date of Registration: **06 December 2026**
- Orientation Session: **13 December 2026**
- Program Duration: **14 December – 30 January 2027**
- Mode of Training: **Online**
- Total No. of Seats: **350**
- Students will be divided into small interactive batches to ensure effective participation and personalized learning.

Program Includes:

- Live expert-led lectures
- Scientific Talk
- Interactive learning sessions
- Recorded session access
- Learning Management System (LMS) access
- Course notes and study resources
- Weekly assignments and activities
- Practical and observation-based learning
- Guided project preparation
- Project mentoring and evaluation
- Dedicated discussion community for announcements and academic support

The detailed academic schedule will be shared with all registered participants before the commencement of the program.

PUBLIC ANNOUNCEMENT

Fee Structure:

Program Fee: ₹2,000/- per participant (GST Included)

The program fee includes access to live classes, Scientific Talks, recorded lectures, digital learning resources, activity worksheets, LMS access, project guidance, project evaluation and certification upon successful completion.

The registration fee is non-refundable.

Program Modules:

Module 1: Introduction to Space Science
Module 2: Solar System & Uncovered Mysteries — Planet 9
Module 3: Life Cycle of Stars — Nuclear Fusion, Neutron Stars & Black Holes
Module 4: Alien Life & Extraterrestrial Worlds — Exoplanets, Habitable Worlds & Search for Life
Module 5: Rocket Science — How Rockets Work, Propulsion Systems & Rocket Engines
Module 6: Satellites, Space Missions & Human Space Exploration
Module 7: Future of Space Science, Space Technology & Careers
Module 8: Mini Space Science Research Project

Successful completion of the project is mandatory for receiving the **Project Completion Certificate**.

Certification:

Participants who successfully complete the program requirements will receive:

- **Winter School Completion Certificate**
- **Project Completion Certificate**

Important Dates:

- Last Date to Register: **06 December 2026**
- Orientation Session: **13 December 2026**
- Program Duration: **14 December – 30 January 2027**
