

Indian Space Olympiad (ISO)

Mock Questions

Foundation Level - Grade 2

5 Mock Papers | 50 Questions Each | Easy Grade-2 Practice

Original practice material based on the ISO Foundation Level topic scope.

How to Use These Mock Papers

These mock papers are written only for Grade 2 children. The wording is simple, but the questions are a little more varied than the Grade 1 set.

A child may read independently or ask a parent, teacher or guardian to read a question slowly. Choose one answer: A, B, C or D.

Each paper has 50 questions and carries 50 marks. There is no negative marking. A suggested time is 60 minutes, but additional time may be given for reading.

Questions cover the easiest age-appropriate parts of the Foundation Level syllabus: the sky, directions, seasons, planets, stars, Earth and Moon, satellites, rockets, ISRO, simple physics, observation and logical reasoning.

Paper 1 is the easiest. Papers 4 and 5 contain a few more application and reasoning questions, while remaining suitable for Grade 2.

Contents

Section	Details
2025 Mock Question Paper 1	50 multiple-choice questions
2025 Mock Question Paper 2	50 multiple-choice questions
2025 Mock Question Paper 3	50 multiple-choice questions
2025 Mock Question Paper 4	50 multiple-choice questions
2025 Mock Question Paper 5	50 multiple-choice questions
Answer Key	Answers for all five papers
Parent and Teacher Review Guide	Simple scoring and revision guidance

2025 Mock Question Paper 1

Indian Space Olympiad (ISO) - Foundation Level - Grade 2

Instruction: Choose the correct answer. Tick or circle only one option for each question.

Questions: 50	Marks: 50	Suggested time: 60 minutes
Answer type: A/B/C/D	Question may be read aloud	Negative marking: No

A. Sky, Directions and Observations

1. What is the study of the sky, stars and planets called?

A. Astronomy	B. Cooking
C. Painting	D. Dancing

2. Which object is usually seen shining in the daytime sky?

A. A pencil	B. A shoe
C. The Sun	D. A chair

3. Which objects are easiest to see in a clear night sky?

A. School bags	B. Doors
C. Stars	D. Plates

4. In which direction does the Sun appear to rise?

A. West	B. North
C. South	D. East

5. In which direction does the Sun appear to set?

A. North	B. East
C. South	D. West

6. Which season is usually the hottest in India?

A. Summer	B. Spring only
C. Winter	D. Night

7. Which season is usually the coldest?

A. Winter	B. Monsoon
C. Noon	D. Summer

8. Which item is most useful during the rainy or monsoon season?

A. Woollen cap only	B. Sunglasses at night
C. Raincoat	D. Space helmet

9. What is the safe rule when observing the Sun?

A. Never look directly at it	B. Look through a toy lens
C. Stare at it for one minute	D. Use bare eyes at noon

10. A pattern made by a group of stars is called a:

A. Calendar	B. Constellation
C. Cloud	D. Continent

B. The Solar System

11. What is at the centre of our Solar System?

A. The Moon	B. Earth
C. Mars	D. The Sun

12. How many planets are in our Solar System?

A. Eight	B. Ten
C. Twelve	D. Four

13. Which planet is closest to the Sun?

A. Neptune	B. Mars
C. Mercury	D. Earth

14. Which planet is second from the Sun?

A. Earth	B. Mars
C. Venus	D. Jupiter

15. Which planet is third from the Sun?

A. Earth	B. Saturn
C. Mars	D. Venus

16. Which planet is fourth from the Sun?

A. Earth	B. Mars
C. Jupiter	D. Mercury

17. Which planet is fifth from the Sun?

A. Saturn	B. Mars
C. Neptune	D. Jupiter

18. Which planet is sixth from the Sun?

A. Earth	B. Uranus
C. Saturn	D. Jupiter

19. Which planet is seventh from the Sun?

A. Uranus	B. Saturn
C. Neptune	D. Mars

20. Which planet is eighth from the Sun?

A. Earth	B. Jupiter
C. Uranus	D. Neptune

C. Stars, Earth and the Moon

21. Which is the nearest star to Earth?

A. The Moon	B. The Sun
C. Mars	D. Sirius

22. Which objects make their own light?

A. Moons	B. Stars
C. Planets	D. Asteroids

23. Why do stars look tiny from Earth?

A. They are smaller than grains of sand	B. They only shine for one second
C. They hide in clouds	D. They are very far away

24. Some stars look brighter than others because of their distance and:

A. Brightness	B. Taste
C. Sound	D. Shoe size

25. What is the name of our galaxy?

A. The Earth Ring	B. The Sun Road
C. The Milky Way	D. The Blue Ocean

26. A galaxy is a huge group of:

A. Mountains only	B. Stars, gas and dust
C. Classrooms	D. Clouds on Earth only

27. The Universe includes:

A. All space and everything in it	B. Only the Sun
C. Only Earth	D. Only eight planets

28. Which planet is our home?

A. Mercury	B. Saturn
C. Mars	D. Earth

29. Earth is shaped most like a:

A. Cube	B. Flat plate
C. Triangle	D. Ball

30. Earth has land and:

A. Only ice	B. Water
C. No air	D. Only sand

D. Satellites, Rockets, ISRO and Exploration

31. A satellite made by people is called an:

A. Ocean	B. Constellation
C. Natural satellite	D. Artificial satellite

32. Which satellite helps carry television and phone signals?

A. Moon phase	B. Weather balloon only
C. Communication satellite	D. Asteroid

33. Which satellite watches clouds and storms?

A. Comet	B. Weather satellite
C. Star	D. Communication satellite only

34. What does GPS help us find?

A. Rocket colour	B. Location and direction
C. Star brightness only	D. Moon craters only

35. An Earth-observation satellite takes pictures of:

A. Earth	B. Only classrooms
C. Only the Sun	D. Only distant stars

36. What carries a spacecraft or satellite into space?

A. Boat	B. Bicycle
C. Train	D. Rocket

37. The place from which a rocket starts is called a:

A. Launch pad	B. Playground slide
C. Moon crater	D. Bus stop

38. A person trained to travel in space is an:

A. Farmer	B. Astronaut
C. Chef	D. Astronomer only

39. What protects an astronaut in space?

A. Swimsuit	B. Spacesuit
C. School uniform	D. Raincoat only

40. A large spacecraft where astronauts may live and work is a:

A. Constellation	B. Space station
C. Meteorite	D. Ocean station

E. Simple Physics and Reasoning

41. What pulls a dropped ball toward the ground?

A. A constellation	B. Sound
C. Gravity	D. Light

42. A push or a pull is called a:

A. Galaxy	B. Force
C. Planet	D. Shadow

43. When an object changes its place, it is in:

A. A season	B. A phase
C. An eclipse	D. Motion

44. What helps our eyes see objects?

A. Silence	B. A calendar
C. Light	D. Gravity only

45. A shadow forms when an object blocks:

A. Air	B. Light
C. Sound	D. Gravity

46. Which gives Earth much of its heat?

A. A satellite dish	B. The Sun
C. A telescope	D. The Moon

47. What surrounds us and fills the atmosphere?

A. Starlight only	B. Rocket metal
C. Moon dust	D. Air

48. The atmosphere is like a blanket of:

A. Water around Mars	B. Air around Earth
C. Rocks around the Sun	D. Stars around the Moon

49. Which simple machine is a sloping surface?

A. Ramp	B. Battery
C. Mirror	D. Wheel only

50. Which object makes moving loads easier by rolling?

A. Wheel	B. Cloud
C. Shadow	D. Moon phase

2025 Mock Question Paper 2

Indian Space Olympiad (ISO) - Foundation Level - Grade 2

Instruction: Choose the correct answer. Tick or circle only one option for each question.

Questions: 50	Marks: 50	Suggested time: 60 minutes
Answer type: A/B/C/D	Question may be read aloud	Negative marking: No

A. Sky, Directions and Observations

1. Riya sees the Sun low in the eastern sky. It is probably:

A. Winter only	B. Late night
C. Morning	D. Midnight

2. Arjun sees the Sun low in the western sky. It is probably:

A. Noon	B. Midnight
C. Evening	D. Early morning

3. Which list contains the four main directions?

A. Sun, Moon, Earth and Mars	B. Red, Blue, Green and Yellow
C. North, South, East and West	D. Up, Down, Hot and Cold

4. Which direction is opposite to east?

A. Up	B. South
C. North	D. West

5. Which direction is opposite to north?

A. South	B. East
C. West	D. Left only

6. Which instrument helps us see very far objects in the sky?

A. Telescope	B. Comb
C. Spoon	D. Thermometer

7. A telescope makes a distant object appear:

A. Closer and clearer	B. Under the ground
C. Hotter	D. Smaller and darker

8. Which of these can be seen in the sky?

A. Pillows	B. Clouds
C. Shoes	D. Cupboards

9. Which object can sometimes be seen even during the day?

A. A football goal	B. A cupboard
C. The Moon	D. A classroom desk

10. One full day and night together take about:

A. 2 hours	B. 24 hours
C. 5 minutes	D. 100 days

B. The Solar System

11. Which is the correct order of the first four planets?

A. Mercury, Venus, Earth, Mars	B. Venus, Mercury, Mars, Earth
C. Earth, Mars, Venus, Mercury	D. Mars, Earth, Mercury, Venus

12. Which planet comes just after Earth?

A. Mercury	B. Saturn
C. Venus	D. Mars

13. Which planet comes just before Earth?

A. Venus	B. Neptune
C. Jupiter	D. Mars

14. Which planet lies between Mars and Saturn?

A. Earth	B. Uranus
C. Venus	D. Jupiter

15. Which planet is farthest from the Sun?

A. Earth	B. Neptune
C. Mars	D. Mercury

16. Which is the largest planet?

A. Earth	B. Mars
C. Jupiter	D. Mercury

17. Which is the smallest planet?

A. Saturn	B. Earth
C. Jupiter	D. Mercury

18. Which planet is called the Red Planet?

A. Mars	B. Venus
C. Mercury	D. Neptune

19. Which planet is most famous for its large rings?

A. Mars	B. Earth
C. Saturn	D. Venus

20. Which planet appears blue-green because of gases in its atmosphere?

A. Mars	B. Uranus
C. Mercury	D. Venus

C. Stars, Earth and the Moon

21. How many continents are commonly taught on Earth?

A. Ten	B. Seven
C. Two	D. Four

22. How many oceans are commonly named?

A. One	B. Five
C. Nine	D. Three

23. Which is the largest ocean?

A. Pacific Ocean	B. Indian Ocean
C. Arctic Ocean	D. Atlantic Ocean

24. The blanket of air around Earth is called the:

A. Galaxy	B. Crater
C. Asteroid belt	D. Atmosphere

25. Earth's spinning movement is called:

A. Revolution	B. Rotation
C. Reflection	D. Melting

26. Earth's rotation causes:

A. The Moon to disappear forever	B. Oceans to become stars
C. Day and night	D. All planets to stop

27. Earth's movement around the Sun is called:

A. Evaporation	B. Rotation only
C. Reflection	D. Revolution

28. One revolution of Earth around the Sun takes about:

A. One hour	B. One year
C. One minute	D. One day

29. The imaginary line through Earth's North and South Poles is its:

A. Tail	B. Ring
C. Shadow	D. Axis

30. Seasons are linked to Earth's movement and its:

A. Tilt	B. Number of oceans
C. Colour	D. Moon craters

D. Satellites, Rockets, ISRO and Exploration

31. A reusable rocket is designed to be:

A. Used again	B. Turned into a planet
C. Left in a classroom	D. Used only underwater

32. A satellite usually moves along a path called an:

A. Orbit	B. Ocean
C. Road on Earth	D. Axis of a pencil

33. Which organisation leads India's space programme?

A. ISRO	B. FIFA
C. UNESCO only	D. WHO

34. Chandrayaan missions study the:

A. Sun	B. Jupiter
C. Mars	D. Moon

35. Mangalyaan studied:

A. The Moon	B. Saturn's rings only
C. Mars	D. Venus only

36. Aditya-L1 studies the:

A. Mars	B. Sun
C. Moon	D. Earth's oceans only

37. Gaganyaan is India's programme for:

A. Making weather on Earth	B. Human spaceflight
C. Building oceans	D. Studying only plants

38. What was India's first satellite called?

A. Aryabhata	B. Chandrayaan
C. Mangalyaan	D. Gaganyaan

39. Who was the first Indian citizen to travel to space?

A. Rakesh Sharma	B. Homi Bhabha
C. C. V. Raman	D. Vikram Sarabhai

40. Kalpana Chawla was a famous:

A. Painter only	B. Cricketer
C. Astronaut	D. Ocean explorer

E. Simple Physics and Reasoning

41. Opening a drawer toward you is mainly a:

A. Pull	B. Reflection
C. Push	D. Orbit

42. Closing a door away from you is mainly a:

A. Tide	B. Rotation
C. Pull	D. Push

43. Why does a thrown ball come back down?

A. The Moon calls it	B. The ball becomes tired
C. Gravity pulls it	D. The air turns it into a rock

44. Where should a torch be placed to make a clear shadow of a toy?

A. With no light at all	B. Under water only
C. On one side of the toy	D. Inside the toy

45. Why can a shadow change during the day?

A. The Moon becomes a planet	B. The Sun's position in the sky changes
C. Earth loses gravity	D. The object changes its name

46. A clear glass window lets much light pass through. It is:

A. A constellation	B. A magnet
C. Opaque	D. Transparent

47. A thick wall blocks light. It is:

A. Opaque	B. Transparent
C. A force	D. A star

48. What happens when light hits a mirror?

A. It reflects	B. It becomes gravity
C. It turns into air	D. It makes a planet

49. What can heat do to a cold object?

A. Make it invisible	B. Stop all motion
C. Turn it into a galaxy	D. Warm it

50. Wind is:

A. A Moon phase	B. A kind of planet
C. Moving air	D. Moving rock

2025 Mock Question Paper 3

Indian Space Olympiad (ISO) - Foundation Level - Grade 2

Instruction: Choose the correct answer. Tick or circle only one option for each question.

Questions: 50	Marks: 50	Suggested time: 60 minutes
Answer type: A/B/C/D	Question may be read aloud	Negative marking: No

A. Sky, Directions and Observations

1. Where are more stars usually visible?

A. Next to a torch	B. Inside a brightly lit room
C. Away from bright city lights	D. Under a table

2. What can a young sky watcher use to record observations?

A. A toothbrush	B. A shoe box only
C. A frying pan	D. A notebook

3. Who should be with a young child during night-sky observation?

A. Nobody	B. Only a toy
C. A pet fish	D. A trusted adult

4. Saptarishi is best described as:

A. A well-known star pattern	B. A planet
C. An ocean	D. A rocket engine

5. Orion is the name of:

A. A continent	B. A satellite dish
C. A constellation	D. A season

6. The Sun is usually highest in the sky around:

A. Midnight	B. Before sunrise
C. Sunset	D. Noon

7. A shadow is often shortest when the Sun is:

A. High in the sky	B. Below the horizon
C. Not shining at all	D. Hidden all night

8. Shadows are often long in the:

A. Middle of the night only	B. Bottom of the sea
C. Morning and evening	D. Middle of a dark room

9. The line where the sky seems to meet the land is called the:

A. Galaxy	B. Crater
C. Horizon	D. Orbit

10. A cloudy sky tells us something about the:

A. Name of a galaxy	B. Number of planets
C. Weather	D. Shape of a rocket

B. The Solar System

11. Which planet is often called the Blue Planet?

A. Mars	B. Saturn
C. Mercury	D. Earth

12. Which planet is the hottest?

A. Venus	B. Earth
C. Mars	D. Neptune

13. Jupiter is a very large:

A. Moon	B. Comet tail
C. Giant planet	D. Dwarf planet

14. Mercury, Venus, Earth and Mars are mostly:

A. Rocky planets	B. Comets
C. Galaxies	D. Stars

15. Jupiter, Saturn, Uranus and Neptune are generally:

A. Small moons	B. Constellations
C. Giant outer planets	D. Continents

16. What is Earth's natural satellite?

A. A rocket	B. The Moon
C. The Sun	D. Mars

17. Planets move around the:

A. Sun	B. Moon
C. North Star	D. Earth only

18. The Moon moves around the:

A. Milky Way	B. Jupiter
C. Sun only	D. Earth

19. Pluto is now placed in which group?

A. Dwarf planets	B. Constellations
C. Oceans	D. Stars

20. An asteroid is mainly a small:

A. Cloud of rain	B. Beam of light
C. Living plant	D. Rocky object in space

C. Stars, Earth and the Moon

21. Does the Moon make its own light?

A. No	B. Yes, like the Sun
C. Only on Mondays	D. Only during rain

22. Why does the Moon shine?

A. It has electric bulbs	B. It stores daylight in boxes
C. It reflects sunlight	D. It burns like fire

23. The changing shapes of the Moon are called its:

A. Continents	B. Seasons
C. Phases	D. Orbits of Earth

24. Which Moon phase looks like a complete round circle?

A. Crescent Moon	B. Half Moon
C. Full Moon	D. New Moon

25. Which Moon phase looks like a thin curved slice?

A. Galaxy	B. Earth
C. Crescent Moon	D. Full Moon

26. During a new Moon, the Moon is usually:

A. Red all night	B. Hard to see from Earth
C. Larger than the Sun	D. A bright full circle

27. Round holes on the Moon's surface are called:

A. Roads	B. Craters
C. Forests	D. Oceans

28. Compared with Earth, the Moon has:

A. Almost no air	B. More thick air
C. Many trees	D. Many rain clouds

29. In a solar eclipse, which object comes between the Sun and Earth?

A. A comet	B. Mars
C. The Moon	D. Jupiter

30. In a lunar eclipse, whose shadow falls on the Moon?

A. Earth's shadow	B. Mars's shadow
C. A cloud's shadow	D. A rocket's shadow

D. Satellites, Rockets, ISRO and Exploration

31. Who is often called the father of the Indian space programme?

A. Neil Armstrong	B. Vikram Sarabhai
C. Rakesh Sharma	D. Galileo Galilei

32. A. P. J. Abdul Kalam worked as a scientist with rockets and:

A. Forests only	B. Musical instruments
C. Missiles	D. Oceans

33. Chandrayaan-3 achieved a soft landing on the:

A. Moon	B. Jupiter
C. Asteroid belt	D. Sun

34. A small vehicle that moves on the surface of another world is a:

A. Constellation	B. Weather map
C. Telescope	D. Rover

35. A spacecraft part that touches down on a world is a:

A. Orbiter only	B. Comet tail
C. Lander	D. Star chart

36. A spacecraft that goes around a planet or Moon is an:

A. Rocket pad	B. Crater
C. Ocean	D. Orbiter

37. Before a space mission, astronauts spend a lot of time:

A. Training	B. Avoiding exercise
C. Sleeping all day	D. Learning no science

38. Astronauts may seem to float because they are in:

A. Thick mud	B. Microgravity
C. A strong wind on Earth	D. Heavy rain

39. The International Space Station moves around:

A. The Moon	B. Earth
C. Mars	D. The Sun only

40. Which mission first landed humans on the Moon?

A. Apollo 11	B. Mangalyaan
C. Aryabhata	D. Aditya-L1

E. Simple Physics and Reasoning

41. Complete the pattern: Sun, Moon, Sun, Moon, __.

A. Earth	B. Star only
C. Sun	D. Mars

42. Complete the pattern: Star, Star, Moon, Star, Star, Moon, __.

A. Rocket	B. Ocean
C. Sun	D. Star

43. One planet and two more planets make how many planets?

A. One	B. Two
C. Three	D. Eight

44. There are eight planets. One is Earth. How many are other planets?

A. Six	B. Eight
C. Nine	D. Seven

45. Which does not belong: Sun, Moon, Star, Chair?

A. Star	B. Moon
C. Chair	D. Sun

46. Which does not belong: Rocket, Satellite, Astronaut, Mango?

A. Satellite	B. Rocket
C. Astronaut	D. Mango

47. Which order goes from smallest to largest?

A. Earth, Moon, Sun	B. Sun, Earth, Moon
C. Sun, Moon, Earth	D. Moon, Earth, Sun

48. Which is the correct time order?

A. Night, morning, evening, noon	B. Noon, morning, night, evening
C. Evening, noon, morning, night	D. Morning, noon, evening, night

49. If you face east, which direction is behind you?

A. South	B. West
C. North	D. East

50. If north is at the top of a map, what is at the bottom?

A. West	B. East
C. South	D. The Sun

2025 Mock Question Paper 4

Indian Space Olympiad (ISO) - Foundation Level - Grade 2

Instruction: Choose the correct answer. Tick or circle only one option for each question.

Questions: 50	Marks: 50	Suggested time: 60 minutes
Answer type: A/B/C/D	Question may be read aloud	Negative marking: No

A. Sky, Directions and Observations

1. What should we wear to stay warm in winter?

A. Warm clothes	B. A rain gauge
C. A space antenna	D. A swimsuit only

2. What is a good habit on a very hot summer day?

A. Look at the Sun	B. Wear a wool blanket outside
C. Drink enough water	D. Avoid all shade

3. Why is the daytime sky bright?

A. Stars fall to Earth	B. Clouds make their own light
C. Sunlight reaches our part of Earth	D. The Moon switches on a lamp

4. Why is it night on one side of Earth?

A. That side faces away from the Sun	B. The oceans turn off the light
C. The Moon covers the whole Earth daily	D. The Sun disappears forever

5. Which movement of Earth causes day and night?

A. Growing	B. Floating
C. Rotation	D. Melting

6. What does a compass help us find?

A. Directions	B. Rocket fuel
C. Planet sizes	D. Moon craters

7. On most maps, which direction is shown at the top?

A. East	B. South
C. West	D. North

8. The direction of sunrise gives us a clue for finding:

A. West	B. East
C. The Moon phase	D. The number of stars

9. The direction of sunset gives us a clue for finding:

A. East	B. North only
C. The season only	D. West

10. What should we do to notice changes in the Moon?

A. Observe it on several nights	B. Look directly at the Sun
C. Keep all curtains closed	D. Look only once for one second

B. The Solar System

11. Most asteroids in our Solar System are found between Mars and:

A. Neptune	B. Earth
C. Mercury	D. Jupiter

12. A comet is mostly made of ice, dust and:

A. Wood	B. Paper
C. Rocky material	D. Grass

13. A comet may grow a bright tail when it comes near the:

A. Ocean floor	B. North Pole only
C. Earth's classroom	D. Sun

14. A bright streak caused by a small space rock burning in the sky is a:

A. Satellite dish	B. Galaxy
C. Meteor	D. Continent

15. A space rock that reaches the ground is called a:

A. Star chart	B. Telescope
C. Meteorite	D. Moon phase

16. The Solar System includes the Sun and objects that:

A. Live in oceans	B. Grow in soil
C. Move around it	D. Stay inside houses

17. Do planets make their own light like stars?

A. No	B. Only Earth does
C. Only Mars does	D. Yes, always

18. Why can we see planets?

A. They are made of lamps	B. They burn like candles
C. They are painted bright	D. They reflect sunlight

19. Which planet has large amounts of liquid water on its surface?

A. Mars	B. Mercury
C. Venus	D. Earth

20. How many small moons does Mars have?

A. Eight	B. None
C. One	D. Two

C. Stars, Earth and the Moon

21. Tides are the regular rise and fall of:

A. Mountains	B. Stars
C. Roads	D. Sea water

22. Which object strongly helps cause tides on Earth?

A. A chair	B. A constellation
C. The Moon	D. A rocket launch pad

23. Earth and its Moon together form the:

A. Asteroid belt	B. Sun's surface
C. Milky Way only	D. Earth-Moon system

24. A very large area of land is called a:

A. Meteor	B. Orbit
C. Crater	D. Continent

25. A huge body of salty water is called an:

A. Asteroid	B. Constellation
C. Ocean	D. Rocket

26. Why does Earth look blue from space?

A. It has a lot of water	B. It reflects no light
C. It is made only of ice	D. It is painted blue

27. The Sun appears to move across the sky mainly because Earth:

A. Rotates	B. Shrinks
C. Turns into the Moon	D. Stops moving

28. Why are stars easier to see at night?

A. Stars only exist at night	B. The Moon makes them
C. Earth moves closer to all stars	D. The sky is darker

29. Our Solar System is inside the:

A. Pacific Ocean	B. Moon crater
C. Milky Way galaxy	D. Earth's atmosphere

30. The Milky Way contains our:

A. Only Mars	B. Only the Moon
C. Sun and Solar System	D. Only satellites made by people

D. Satellites, Rockets, ISRO and Exploration

31. A Mars rover is a:

A. Living animal	B. Star
C. Weather cloud	D. Robot explorer

32. Why is a telescope placed in space?

A. To make rain	B. To push the Moon
C. To observe without much of Earth's atmosphere blocking the view	D. To grow forests

33. Solar panels on a satellite make:

A. Rain	B. Rocket fuel from water only
C. Electricity from sunlight	D. Oxygen for Earth

34. A satellite antenna sends and receives:

A. Moon dust	B. Tree roots
C. Signals	D. Ocean waves only

35. A rocket rises because hot gases are pushed:

A. Nowhere	B. Downward
C. Upward only	D. Sideways into a classroom

36. What usually happens just before a rocket launches?

A. A school lunch	B. A Moon phase change
C. A snowfall	D. A countdown

37. Who watches and guides a mission from Earth?

A. Only passengers on a bus	B. A shopkeeper
C. Mission control team	D. A football referee

38. A launch window is:

A. A star pattern	B. A suitable time for launch
C. A Moon crater	D. A glass window in a classroom

39. Which technology can send a live television programme over long distances?

A. Meteorite	B. Communication satellite
C. Moon crater	D. Comet

40. Which satellite can help warn people about a cyclone?

A. Natural Moon	B. Asteroid
C. Navigation satellite only	D. Weather satellite

E. Simple Physics and Reasoning

41. How many stars are shown in the picture?

A. Two	B. Five
C. Four	D. Three

42. Which comes next in the picture pattern?

A. A rocket	B. The Sun
C. Earth	D. The Moon

43. Complete the number pattern: 2, 4, 6, __.

A. 8	B. 5
C. 10	D. 7

44. Complete the number pattern: 1, 3, 5, __.

A. 4	B. 8
C. 7	D. 6

45. Complete the shape pattern: Circle, triangle, circle, triangle, __.

A. Star	B. Square
C. Circle	D. Triangle only

46. Which pair shows a hot object and a cold object?

A. Chair and pencil	B. Moon and Sun
C. Sun and ice	D. Ice and fire

47. Can a clear shadow form in complete darkness?

A. Yes, always	B. No
C. Only in summer	D. Only on Mars

48. A stronger push can often make a toy car move:

A. Faster	B. Not at all
C. Into the sky without a rocket	D. Back in time

49. Which material is strongly attracted by a magnet?

A. Wood	B. Paper
C. Iron	D. Plastic

50. What can power a small torch?

A. A continent	B. A Moon crater
C. A battery	D. A constellation

2025 Mock Question Paper 5

Indian Space Olympiad (ISO) - Foundation Level - Grade 2

Instruction: Choose the correct answer. Tick or circle only one option for each question.

Questions: 50	Marks: 50	Suggested time: 60 minutes
Answer type: A/B/C/D	Question may be read aloud	Negative marking: No

A. Sky, Directions and Observations

1. Which of these is an astronomical instrument?

A. Water bottle	B. Telescope
C. Lunch box	D. Pencil sharpener

2. Binoculars are useful because they help us see:

A. Underground water	B. Sounds
C. Smells	D. Faraway objects

3. What can a star chart help us find?

A. Constellations	B. School uniforms
C. Sandwiches	D. Ocean water

4. A scientist who studies objects in space is an:

A. Carpenter	B. Artist only
C. Chef	D. Astronomer

5. To observe means to:

A. Watch carefully	B. Guess without looking
C. Hide the object	D. Sleep

6. To measure means to find a:

A. Colour name only	B. Size, number, distance or time
C. Song	D. Dream

7. Which tool helps us keep track of days and months?

A. Magnet	B. Telescope
C. Rocket	D. Calendar

8. A sundial uses the Sun and a:

A. Shadow	B. Battery
C. Cloud	D. Television

9. Astronomy has helped people make calendars and find:

A. Directions	B. Flavours
C. Toy colours	D. Shoe sizes

10. Which sky is best for seeing many stars?

A. A closed cupboard	B. A sunny noon sky
C. A cloudy, brightly lit sky	D. A clear, dark sky

B. The Solar System

11. Which planet has many known moons?

A. Mercury	B. Venus
C. Jupiter	D. Earth only

12. Saturn's rings are mostly made of pieces of ice and:

A. Leaves	B. Rock
C. Cotton	D. Wood

13. Why could we not stand on Jupiter as we stand on Earth?

A. It has no solid surface like Earth	B. It is a star
C. It is smaller than a marble	D. It is inside the Moon

14. Which planet is very far from the Sun and very cold?

A. Venus	B. Mercury
C. Earth	D. Neptune

15. Which planet takes the shortest time to go around the Sun?

A. Earth	B. Neptune
C. Mercury	D. Saturn

16. About how long does Earth take to go around the Sun once?

A. One week	B. Ten minutes
C. One year	D. One hour

17. About how long does Earth take to spin once?

A. One month	B. One year
C. One day	D. Eight years

18. Which is much bigger?

A. The Moon	B. A comet pebble
C. Earth	D. The Sun

19. Which is smaller?

A. Earth	B. The Moon
C. Jupiter	D. The Sun

20. A “shooting star” seen in the sky is usually a:

A. Meteor	B. Satellite station
C. Real star falling	D. Planet

C. Stars, Earth and the Moon

21. Which is smaller?

A. Earth	B. The Moon
C. Jupiter	D. The Sun

22. Which is larger?

A. The Moon	B. A small asteroid
C. Earth	D. A school globe

23. The Moon takes about how long to go around Earth?

A. About ten years	B. About one hour
C. About one minute	D. About one month

24. Clouds do not cause day and night. Day and night are caused by Earth's:

A. Rain	B. Mountains
C. Rotation	D. Oceans

25. Seasons do not happen because the Sun turns off. They are connected with Earth's:

A. Clouds only	B. Continents only
C. Colour and size	D. Tilt and revolution

26. Which two things are especially important for life on Earth?

A. No light and no air	B. Only rocks
C. Air and water	D. Only rings

27. Which event happens when Earth's shadow darkens the Moon?

A. Meteor shower	B. Lunar eclipse
C. Solar eclipse	D. Sunrise

28. How should a solar eclipse be viewed?

A. By staring at the Sun	B. Through a toy telescope
C. With bare eyes	D. Only with safe approved protection and adult guidance

29. Many Moon craters were formed when space rocks:

A. Hit the Moon	B. Grew into trees
C. Turned into clouds	D. Watered the Moon

30. Galaxies may contain:

A. Only one grain of sand	B. Billions of stars
C. No stars at all	D. Only one chair

D. Satellites, Rockets, ISRO and Exploration

31. Which tool in a phone can show a route to a place?

A. GPS map	B. Telescope lens
C. Moon phase chart only	D. Rocket engine

32. Satellite pictures can help farmers check:

A. Crops and fields	B. Moon songs
C. Star names only	D. Rocket seats

33. A Moon mission sends back:

A. Classroom chalk	B. Only toys
C. Scientific data	D. Ocean fish

34. A Mars mission helps scientists learn about:

A. Mars	B. Only the Sun
C. Only the Moon	D. Only Earth's school roads

35. Aditya-L1 sends information about:

A. The Sun	B. Saturn's rings only
C. The Moon's oceans	D. Earth's forests only

36. A space probe is usually a:

A. Mountain	B. Robot spacecraft
C. Cloud	D. Living bird

37. Which spacecraft part can carry astronauts?

A. Crew capsule	B. Telescope tripod
C. Asteroid belt	D. Star chart

38. A parachute helps a returning capsule:

A. Slow down	B. Become a star
C. Leave the Solar System	D. Go faster upward

39. Why do astronauts exercise in space?

A. To create Moon craters	B. To stop Earth rotating
C. To make the Sun brighter	D. To keep muscles and bones strong

40. Old, unused objects left in orbit are called:

A. Space debris	B. Moon phases
C. Constellations	D. Continents

E. Simple Physics and Reasoning

41. Electricity in a torch is changed mainly into:

A. A planet	B. Tides
C. Gravity	D. Light

42. Sound usually travels to our ears through:

A. Empty space only	B. A star chart
C. A shadow	D. Air

43. Why can people not hear normally on the Moon without radios?

A. The Sun blocks sound	B. The Moon has too many trees
C. The Moon is too bright	D. There is almost no air to carry sound

44. A parachute slows a falling object because of:

A. Moonlight	B. A constellation
C. Magnetism only	D. Air resistance

45. Which simple machine can help raise a flag?

A. Battery	B. Thermometer
C. Pulley	D. Mirror

46. What does a balance scale compare?

A. Mass or heaviness	B. Directions
C. Moon phases	D. Star brightness only

47. The chart shows stars counted on three days. On which day were the most stars counted?

A. Monday	B. Wednesday
C. The same on all days	D. Tuesday

48. Which is the correct rocket sequence?

A. Countdown, launch, space travel	B. Space travel, countdown, launch
C. Moon phase, launch, rain	D. Launch, sleep, countdown

49. The Sun is on the left of the child. Where is the shadow in the picture?

A. There is no shadow	B. To the left
C. To the right	D. Straight above

50. Mercury, Venus and Earth are shown in order. Which planet comes next?

A. Saturn	B. Jupiter
C. Mars	D. Neptune

Answer Key

Use the key after the child completes a paper. Give one mark for each correct answer.

Mock Paper 1

1. A	2. C	3. C	4. D	5. D	6. A	7. A	8. C	9. A	10. B
11. D	12. A	13. C	14. C	15. A	16. B	17. D	18. C	19. A	20. D
21. B	22. B	23. D	24. A	25. C	26. B	27. A	28. D	29. D	30. B
31. D	32. C	33. B	34. B	35. A	36. D	37. A	38. B	39. B	40. B
41. C	42. B	43. D	44. C	45. B	46. B	47. D	48. B	49. A	50. A

Mock Paper 2

1. C	2. C	3. C	4. D	5. A	6. A	7. A	8. B	9. C	10. B
11. A	12. D	13. A	14. D	15. B	16. C	17. D	18. A	19. C	20. B
21. B	22. B	23. A	24. D	25. B	26. C	27. D	28. B	29. D	30. A
31. A	32. A	33. A	34. D	35. C	36. B	37. B	38. A	39. A	40. C
41. A	42. D	43. C	44. C	45. B	46. D	47. A	48. A	49. D	50. C

Mock Paper 3

1. C	2. D	3. D	4. A	5. C	6. D	7. A	8. C	9. C	10. C
11. D	12. A	13. C	14. A	15. C	16. B	17. A	18. D	19. A	20. D
21. A	22. C	23. C	24. C	25. C	26. B	27. B	28. A	29. C	30. A
31. B	32. C	33. A	34. D	35. C	36. D	37. A	38. B	39. B	40. A
41. C	42. D	43. C	44. D	45. C	46. D	47. D	48. D	49. B	50. C

Mock Paper 4

1. A	2. C	3. C	4. A	5. C	6. A	7. D	8. B	9. D	10. A
11. D	12. C	13. D	14. C	15. C	16. C	17. A	18. D	19. D	20. D
21. D	22. C	23. D	24. D	25. C	26. A	27. A	28. D	29. C	30. C
31. D	32. C	33. C	34. C	35. B	36. D	37. C	38. B	39. B	40. D
41. C	42. B	43. A	44. C	45. C	46. C	47. B	48. A	49. C	50. C

Mock Paper 5

1. B	2. D	3. A	4. D	5. A	6. B	7. D	8. A	9. A	10. D
11. C	12. B	13. A	14. D	15. C	16. C	17. C	18. D	19. B	20. A
21. B	22. C	23. D	24. C	25. D	26. C	27. B	28. D	29. A	30. B
31. A	32. A	33. C	34. A	35. A	36. B	37. A	38. A	39. D	40. A
41. D	42. D	43. D	44. D	45. C	46. A	47. D	48. A	49. C	50. C

Parent and Teacher Review Guide

Score	General indication	Suggested next step
45-50	Very strong Grade-2 readiness	Try the next paper and discuss the challenge questions.
35-44	Good understanding	Revise missed topics and try again after a few days.
25-34	Developing understanding	Read simple lessons on planets, Earth-Moon, satellites and basic physics.
Below 25	Needs guided practice	Use pictures, models and read-aloud practice. Do not rush the child.

How to review a wrong answer

Ask the child to explain what they were thinking. Then show a picture, globe, ball, torch or simple model. Explain the idea in one or two sentences and return to the question later.

Reading support

Reading help is allowed for practice. Read every option in the same calm voice and avoid giving clues through tone.

Topics to revise first

Begin with the Sun, Moon, day and night, planet order, Earth as our home, rockets, satellites, gravity, light and simple patterns.

Safety reminder

Never allow a child to look directly at the Sun. Solar observations and eclipses require approved protection and responsible adult supervision.
