

Indian Space Olympiad (ISO) 2026

SYLLABUS - FOUNDATION LEVEL (CLASSES I–IV)

01. Fundamentals of Astronomy

The sky around us, day and night, sunrise and sunset, directions, seasons, observing the sky, stars visible at night, constellations (basic recognition), astronomy in everyday life, simple astronomical observations.

02. The Solar System

The Sun, eight planets, dwarf planets (basic awareness), planetary order, natural satellites, asteroids, comets, meteors and meteorites, basic characteristics of planets.

03. Stars, Galaxies & the Universe

Stars and their brightness, nearest stars, the Milky Way (basic introduction), galaxies (basic awareness), the Universe as a collection of stars and galaxies.

04. Earth & Moon

Earth as our home planet, continents and oceans (basic awareness), Earth's rotation and revolution, day and night, seasons, Moon phases, eclipses (basic concept), tides (basic awareness).

05. Satellites & Space Technology

Natural and artificial satellites, communication satellites, weather satellites, GPS, satellite applications in daily life.

06. Rockets & Launch Vehicles

What rockets are, how rockets reach space (basic concept), launch pads, astronauts, reusable rockets (awareness).

07. ISRO & India's Space Missions

Introduction to ISRO, Chandrayaan, Mangalyaan, Aditya-L1, Gaganyaan, important Indian scientists, India's achievements in space.

08. Space Exploration

Astronauts, space stations, Moon missions, Mars missions (basic awareness), famous space missions.

09. Basic Physics for Space Science

Gravity, force, motion, light, shadows, heat, simple machines, air and atmosphere (basic concepts).

10. Scientific Reasoning & Logical Aptitude

Observation skills, picture reasoning, pattern recognition, classification, sequencing, simple mathematical reasoning, logical thinking.

11. General Space Awareness

Current space events (age appropriate), famous astronauts, planets in news, important discoveries, space facts.
